

January 22, 2019

Attention Anacortes Marina F dock tenants:

Replacement of the docks and breakwater wall at the Marina is continuing on schedule. For October 2019 we plan to replace all of F dock.

To accomplish the replacement of F dock:

We plan on construction to last for 4 weeks beginning October 1st.

Vessel owners will need to move their vessel off the dock by September 30th. As the Marina is currently full, we are investigating moorage options to help you relocate your boat. Please review the options below for the best fit for your vessel.

Option 1: 30' vessels. We are currently in talks with the Port of Anacortes to occupy some of their larger 66' slips for placement of (2) smaller 30' vessels. One vessel would be forward in the slip, have access to shore power but may have limited use. A 2nd vessel located in the slip should not need shore power for the month of October. Rent would be comparable to our current rates. Space may be limited at the Port so you need to contact our office for placement.

Option 2: Larger vessels moored in 50' slips will be harder to place at the Port. We suggest you contact your boat yard and schedule annual maintenance work to be completed during this period. This option was found to be the most popular for vessels displaced during our A dock replacement.

Option 3: For large and small vessels that want to continue to sail in October, relocation to another marina or an extended cruise may work best for you.

Option 4: Should none of these options work for you, you may terminate your current lease agreement with 30 days written notice, from the 1st of any month.

We will be contacting all F dock tenants and owners to confirm receipt of this notice and provide additional information on opportunities for dry storage and moorage at other marinas as they develop.

We look forward to completion of a new F dock and return of all of our current tenants.

All the Best for the New Year.

Marina Staff
