# Anacortes Marina Construction Update

## Current F dock and breakwater replacement projects:

**Work on the F dock replacement is continuing on schedule.** All docks are in place and all pile work completed on the docks. Marina staff will continue to install refurbished dock boxes while we await City fire and construction inspections. Marine Floats electrician is completing the dock wiring and will call for an inspection when their work is completed. **Once inspections are completed, we will notify F dock tenants they can return.**

**We expect all docks to be available to us on November 1<sup>st</sup>.**

**Culbertson Marine is proceeding with replacement of the breakwater.** This week they will complete filling the hole in the breakwater created to pass the new dock into the Marina. They will then return the week of November 4<sup>th</sup> when they will continue work on the angled section of wall at the Marina entrance. If you will be using your vessel during this period contact the Marina office for the most current information or check our website at [anacortesmarina.com](http://anacortesmarina.com) >**News>Notices**. Thank You.
